

POLICY ANALYSIS AS A DNP PROJECT

By
Janet Jones DNP, APRN, CNS

SOUTHEASTERN
LOUISIANA UNIVERSITY

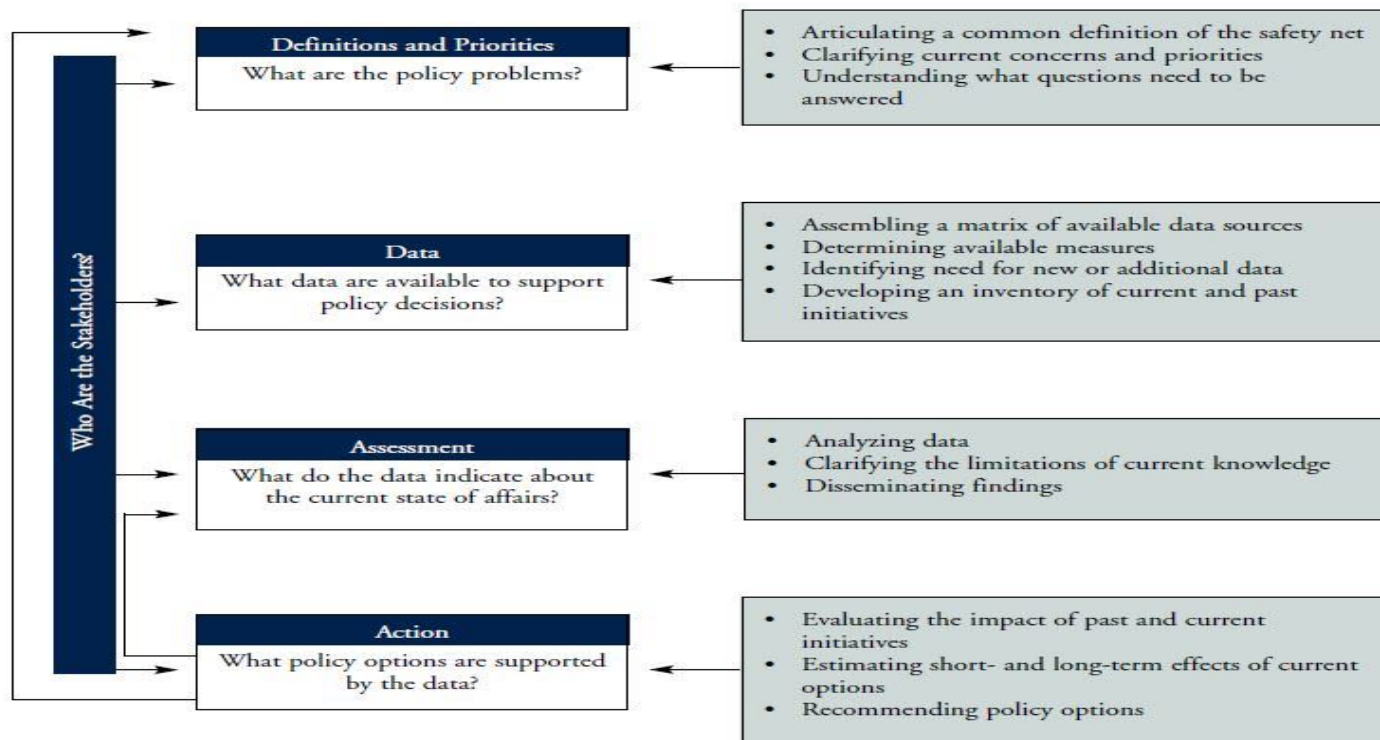

Doctor of Nursing Practice

LEARNING OBJECTIVES

- ▶ Upon completion of this presentation the participant will be able to:
 - ▶ Discuss the Data-Driven Policy-making Model including the 4 stages: definition, data collection, analysis, and action
 - ▶ Analyze the connection between evidence based practice and healthcare policy analysis
 - ▶ Evaluate utilization of the Data-driven Policy-making Model in the development of an advocacy plan to influence policy development and implementation

The Data-driven Policy-making Model

Developing Data-Driven Capabilities to Support Policymaking (Weinick, R.M. & Shin, P.W., 2003, p2)

STAGE 1 - DEFINITIONS & PRIORITIES

Common definitions
Clarify concerns & priorities - Gap Analysis, SWOT
Develop questions to be addressed

Table 1 Gap Analysis

Current Experience	Intervention	Outcome	Gap Analysis Identified
The Louisiana State Board of Pharmacy has developed a PMP available to authorized prescribers of controlled substances.	Conducted an extensive policy analysis of the PMP from a state and regional perspective.	Gained quantitative and qualitative information that may be employed when developing future public policy relative to utilization of the PMP by authorized HCPs.	Although evidence based practice research has indicated information available on the PMP database may have helped HCPs identify individuals at risk for accidental opioid overdose, the PMP has not been widely utilized.

Note: PMP – Prescription Monitoring Program; HCPs – health care providers
York, 2017

STAGE 2 - DATA COLLECTION

- ▶ **Develop a data matrix**
- ▶ **Quantitative**
 - ▶ Demographics - the population impacted
 - ▶ General context of the policies, rules & regulations
 - ▶ Data sources
- ▶ **Qualitative**
 - ▶ Retrospective review of policy documents
 - ▶ Legislative minutes, rules, regulations, statutes, public meeting comments
 - ▶ Regulating agencies & professional societies or organizations
 - ▶ Identify the stakeholders' voices

STAGE 3 - ASSESSMENT

Quantitative

- Contingency Tables
- Prevalence
- Risk Ratios

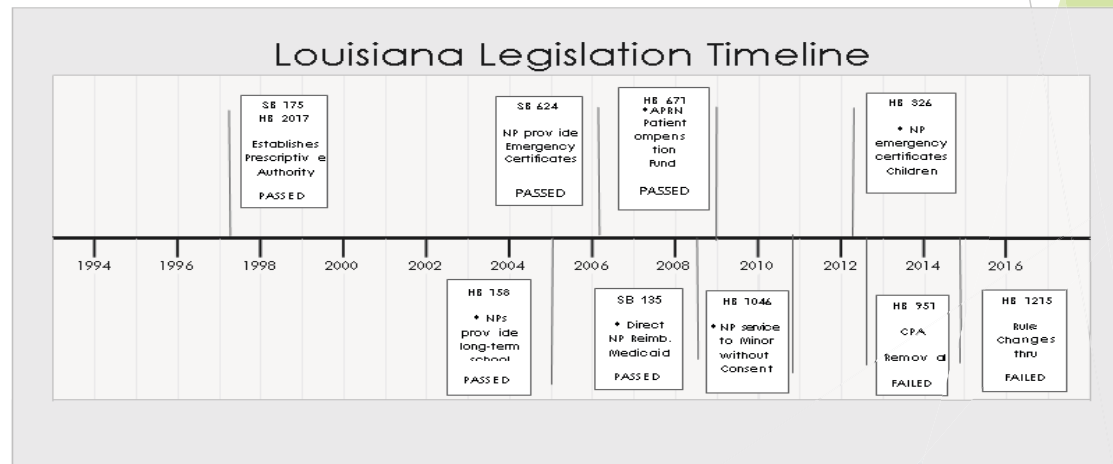

Table 12 Overdose Deaths by Gender, Age Group, Race/Ethnicity and Opioid Type

Gender	LOUISIANA	ALABAMA	ARKANSAS	MISSISSIPPI	TEXAS
Male	185 (71%)	160 (59%)	97 (56%)	67 (58%)	720 (63%)
Female	75 (29%)	110 (41%)	76 (44%)	48 (42%)	431 (37%)
Totals	260 (100%)	270 (100%)	173 (100%)	115 (100%)	1,151 (100%)

York, 2017

Qualitative

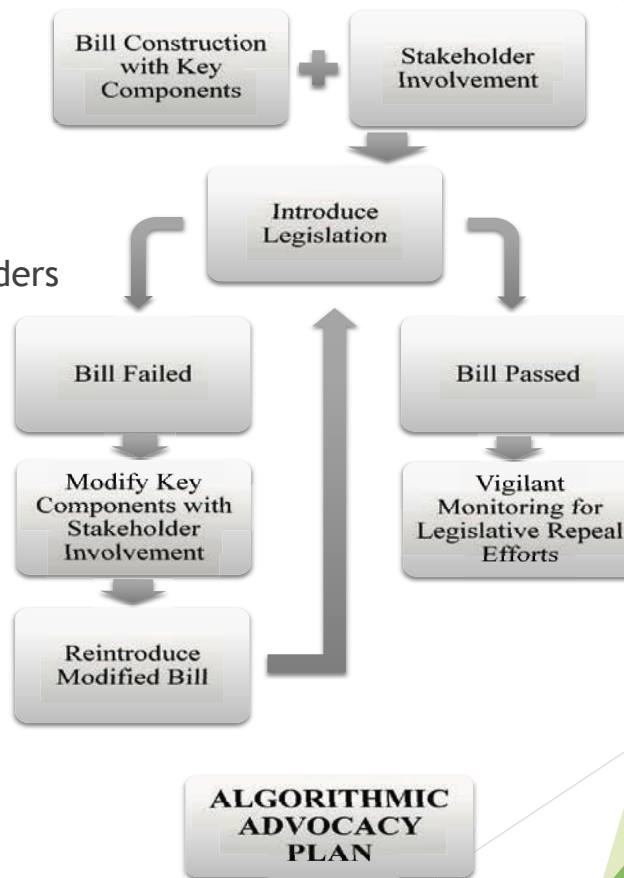

- Timelines
- Dialogue - quotes
- Terminology
- Themes
- Stakeholders

Bayhi, 2015

STAGE 4 - ACTION

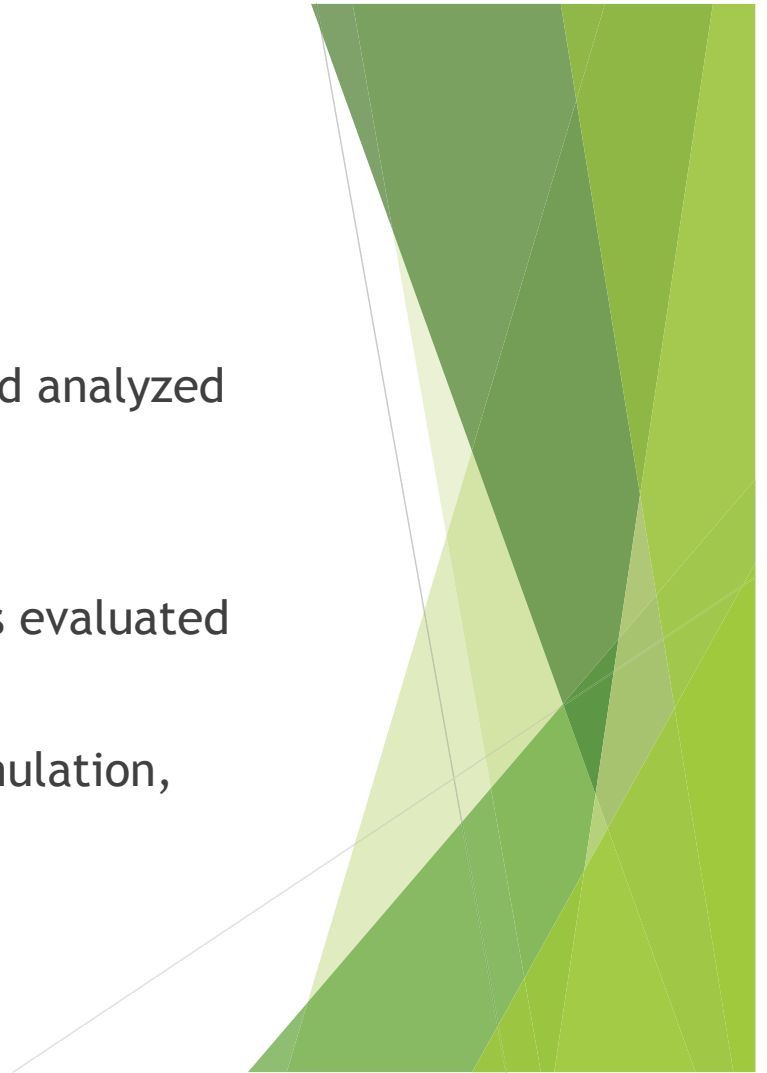

- ▶ Develop an advocacy plan
- ▶ Address to agency of interest & stakeholders
- ▶ White Paper
 - Background
 - Methods
 - Results
 - Recommendations
- No more than 3-5 pages

Bayhi, 2015

CONCLUSIONS

- ▶ Model refines the problem/question
- ▶ Quantitative and qualitative data collected and analyzed
- ▶ Target population's voice is used
- ▶ Stakeholders perspectives addressed
- ▶ Policy's intent, implementation, and outcomes evaluated
- ▶ Emergence of advocacy plan for action
- ▶ Action can include policy maintenance, reformulation, alternative policy, or termination
