

Can Healthcare be accessed by all?

Ami Khan – (DNP) – Student, BSN, BA, RN

Dr. Rhea Ferry – Project chair

Background

Diabetes: a public health challenge among West African immigrants is three fold higher (Alloh et al., 2021)

Aim & Objectives

-Actual and perceived access barriers to healthcare.

Methods

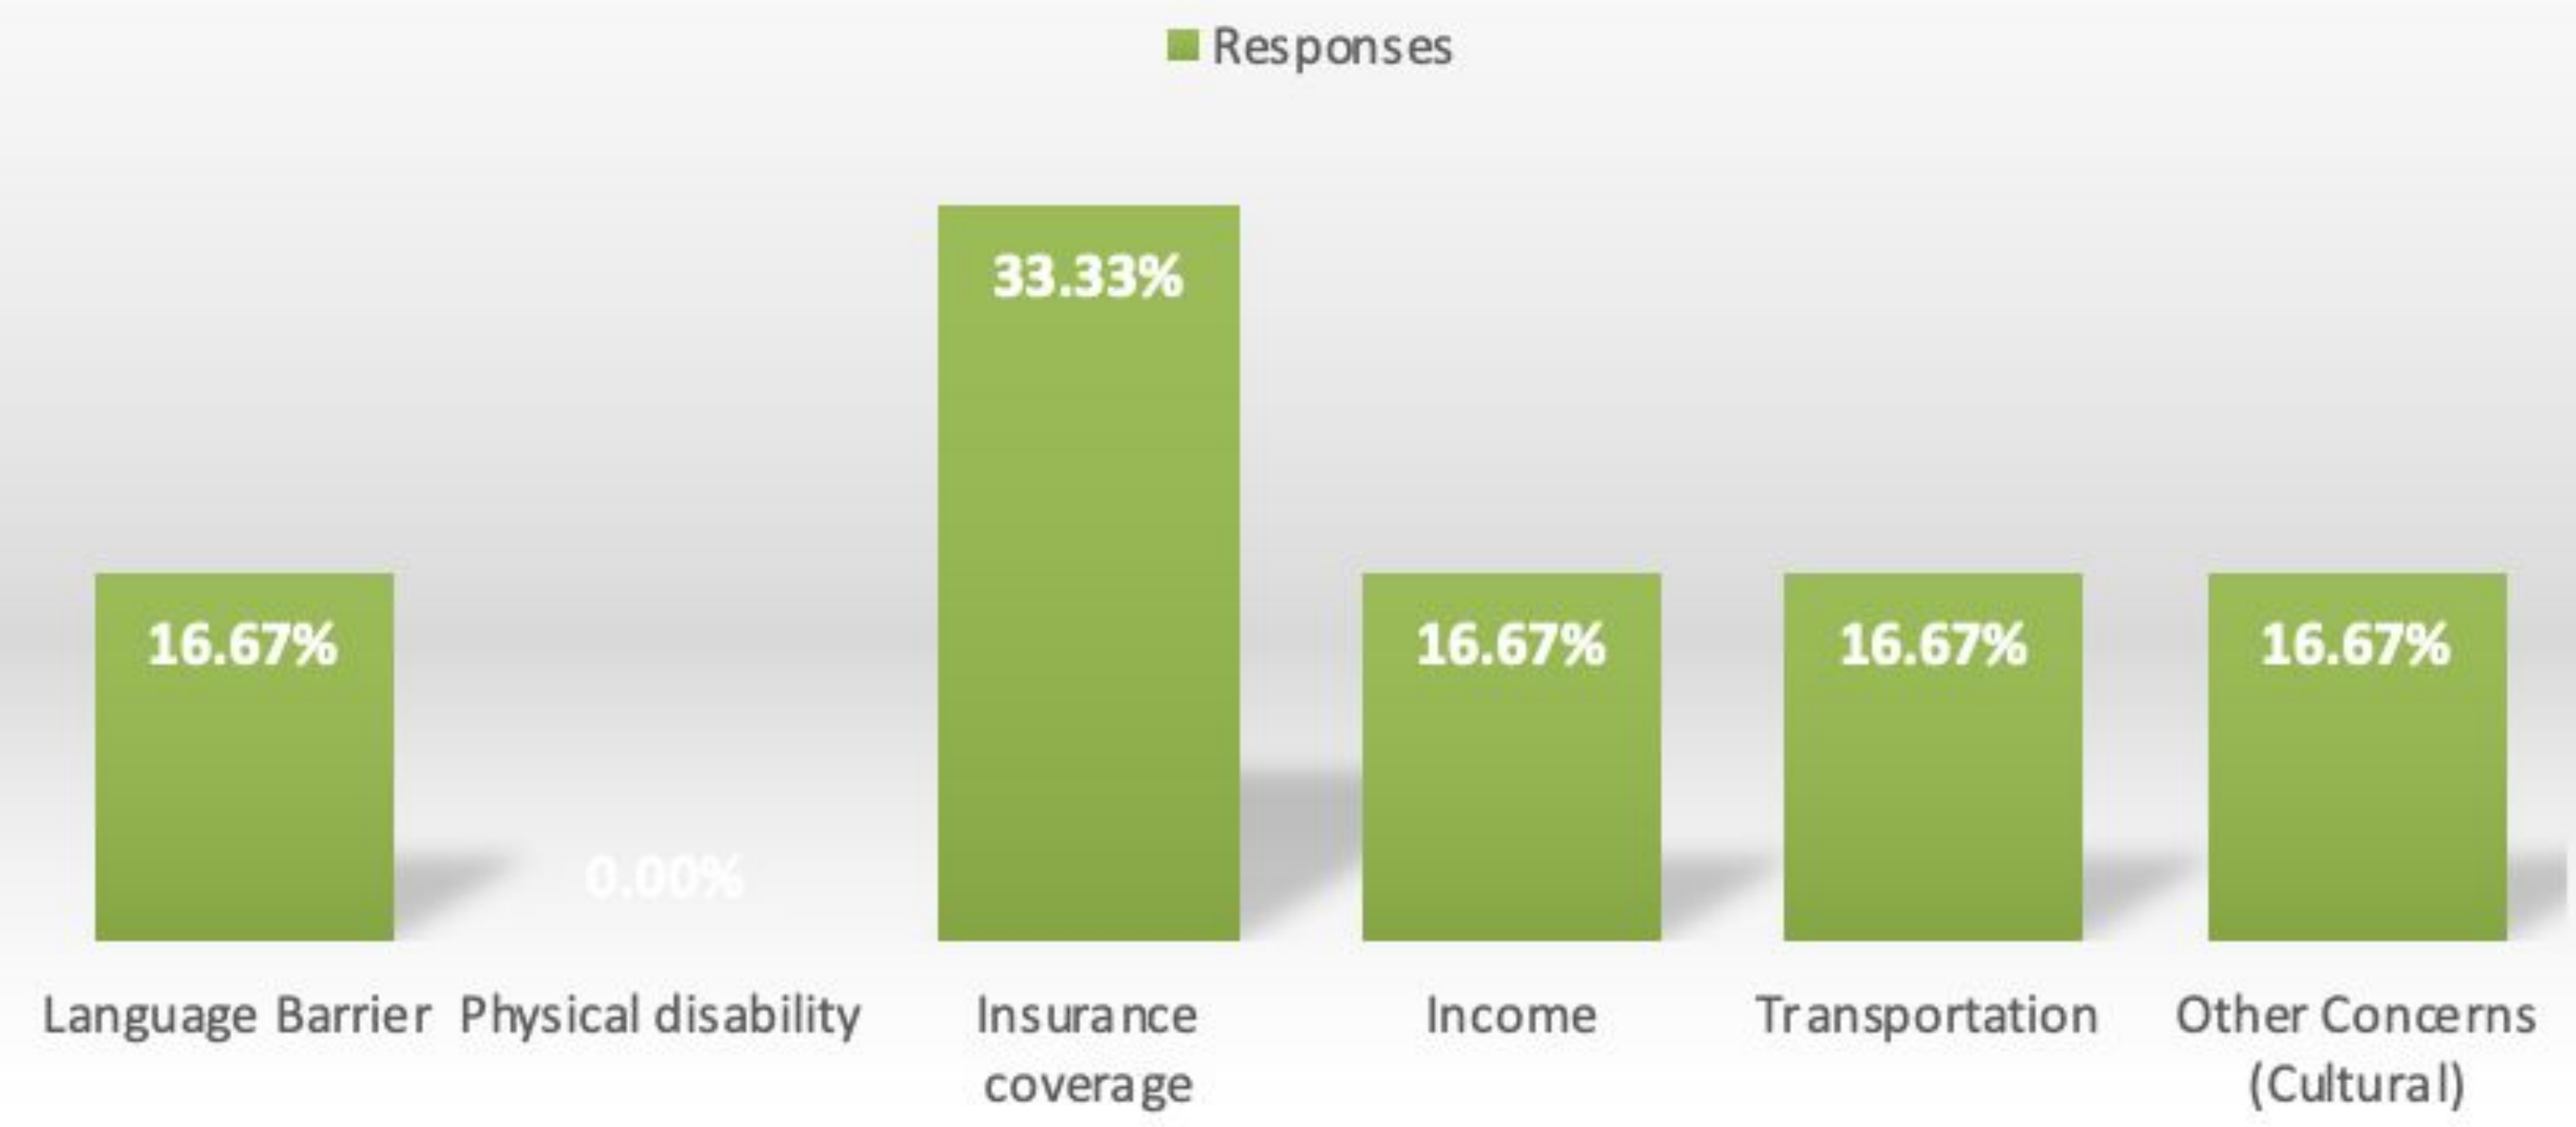

-Structured interviews and surveys
-Closed and open-ended questions

Limitations

-Small sample size (7 participants)

Problems encountered when seeking healthcare.

Results

- Language Barriers (16.67%)
- Insurance Coverage (33.33%)
- Income (16.67%)
- Transportation (16.67%)
- Other Concerns (16.67%)

Conclusions

- health insurance
- language barriers
- low income
- transportation
